

2017 Shader Croft School Survey Results

Notes of Explanation:
 The chart is the result of a survey given to last year's Shader Croft students, their parents and their teachers. Each respondent was asked to assess a student's development as a result of his or her participation in the Shader Croft summer literacy program. The respondents were asked to base their judgment on as much concrete objective data as possible. 39 of 51 students responded, 16 of 27 parents responded (due to language barriers parents of the 24 EEL students were not surveyed) and 18 educators responded (teacher who did not have the student both last year and this year were not surveyed).
